

I am hoping that the FCC does not usurp the Indiana no call law. Before signing up to be on the list, we received multiple calls all evening until around 9:00 pm from companies that we had no desire to be receiving calls from. After signing on, the calls have stopped. We now receive only the calls we want. These calls interrupted our dinner, children's home work, and important calls could not get through. I have an elderly mother in ill health and if my phone is tied up with these useless calls, her caregiver or the hospital would not be able to get through. Once again, please do not override the Indiana no call law!! These companies will take every advantage of it and start bombarding Indiana residents with unwanted calls. Please, take these things into consideration. Sincerely, Steve & Barb Langston
